SPRING
2026

10 years of empowering startups to grow globally

For the past decade, GIN has been connecting startups with international markets and innovation communities across borders. What began as a program to support internationalization has evolved into a platform that enables long-term collaboration between Europe and Asia and strengthens Austria's role as a gateway for global innovation.

AUSTRIA

GO AUSTRIA

GO AUSTRIA is the gateway for startups from the GIN target regions looking to expand their business to Austria and Europe. The tailor-made incubation and internationalization program facilitates partnerships and cooperations and helps build a European base in Austria.

GO ASIA

We bring Austrian startups to the world's most innovative startup hubs, help them build networks with international strategic partners and provide them with essential know-how in terms of market entry and global expansion – strategically and financially.

For **GO AUSTRIA Spring 2026**, startup delegations from Asia are invited to attend an exclusive one-week internationalization program in Vienna during the ViennaUP startup festival. The program offers personalized support from delegation leads and group mentors, as well as access to the wider ecosystem through events like Connect Day, the main matchmaking event for startups, corporate partners and investors of ViennaUP, and more.
